

Ironman 4

Story By Anthony Michael Semione

Anthony Michael Semione as Tony Stark

Taylor Swift as Pepper Potts

Kim Jong-un as Kim Jong Un

Joseph Robert Caravella jr as a kid

Kathryn Schmidt as kid # 2

Ellis Wilkerson as col. Rhodes (I think Elle is HIV positive undetectable can I fight him?)

Tony Semione Jr as Happy Hogan

Samuel L. Jackson as Nick Fury

Paul Bettany as Jarvis

John Slattery as Howard Stark

Ken Jeong or Hawking Aoyama as MODOK

Trump as President Trump

Chaz as 99.1 PLR

AJ as 99.1 PLR

Officer Ally as Officer # 1

Officer Brogan as Officer # 2

Officer Freeborn as Officer # 3

The officer that took me down by the legs # 4

Vince McMahon as a head astronaut

Katy Perry as a head astronaut

Stone Cold as spaceship driver

Professional Wrestlers the other astronauts

Dss # 1 Clarence

DSS # 2 Russell

DSS # 3 Danny

DSS # 4 Bobby

DSS # 5 Peggy

DSS # 6 Willy Jackson

DSS # 7 Terry

DSS # 8 Thomas

Dr. Amy Gardner as prosecution psychiatrist

Adeeb Yacoub as Defense psychiatrist

Dr. Maria T. Santos Dunphy as doctor ordering the Haldol

Stephen Hawking as Dr. Stephen Hawking

Eminem as Eminem

Jeff Bezos as Jeff Bezos

?? as hooker # 1 blonde

?? as hooker # 2 Spanish girl

?? as hooker # 3 black girl

Crystal Ray as Ironmans girl at DSS

Norma Polio as Reporter # 1

Chadwick Boseman as the Black Panther

?? as AOT judge

Carlos as the gay guy

Elon Musk as Elon Musk

Adamar as judge Santiago morales

?? as judge frank tayberry

?? as judge Judith Nixon

Commentator # 1 Jim Ross

Commentator # 2 Jerry "The King" Lawler

Officer Raffone as CO

1. Kim jong-un & war

At the beginning of the story, you can see dictator Kim Jong Un sending threatening messages to the United States about nuking them. Kim Jong Un is one of the villains in this movie, and the US government is quite scared of him. The US is one nuke away from destruction after California got hit with a nuclear bomb. The start of the movie shows Kim Jong Un destroying California with the push of a button. The United States and its Government are in dismay and do not want to start a war. Kim Jong Un threatens to start a war over his life because everyone wants him dead because of his intelligence.

Trump and Kim Jong Un appear tweeting each other. Trump calls Kim Jong-un rocket-man for his love of rockets, and Kim Jong Un calls him dotard. The two are fighting over the bombing of California. Trump meets with Kim Jong Un in 2019 over creating peace between the nations but to no avail. Kim Jong Un just started a war with America, and America knows what to do without starting a nuclear war. Trump says Kim Jong Un and I fell in love at the summit; we liked each other. We both have mutual respect, but it is over, Trump says. He is baffled and does not know what to do about North Korea.

(War Pigs by Black Sabbath)

2. MODOK backstory

MODOK, the main villain of the story, uses Kims' power, bombs, and supplies to take out of the United States and Tony Stark. MODOK happened to meet Kim Jong-un while Kim was buying Vibranium in Wakanda. Kim was buying Vibranium to use for nuclear weapons, and MODOK was doing the same. They hit it off for there over three things: their hatred for tony stark, love for time travel, and nuclear weapons.

MODOK is very smart and is a researcher in time travel and nuclear weapons. Two things that are dear to Kim Jong-uns heart, so they hit it off. It happens that MODOK created the nuclear weapons for Kim bombing California. Nuclear weapons travel across the world according to the new technology by MODOK. The ballistic missiles are powerful, massive, and extremely accurate. Kim only wanted to bomb California because he hates Hollywood and celebrities the most. He is very jealous of their rich and famous lifestyle but loves to watch them on American TV. Kim especially loves American cartoons.

MODOK was born with arthrogryposis multiplex congenital, he is unable to use his arms and legs and instead moves using a wheelchair. It did not affect his intelligence. He has superhuman

intelligence and his name originates from Stephen Hawking, the other incredibly intelligent scientist in a wheelchair. MODOK has intelligence and sits in a wheelchair because he is so smart. MODOK works with North Korean scientists and Kim Jong-un on time travel. The North Koreans were the first to realize the power of black holes. MODOK and North Korean scientists are competing with the United States on creating the time machine first. The time machine is possible because of the black hole approaching that just ate up Mercury. Its temperature is hot. Black holes are usually cold on the inside and hot on the outside, but since it just got ate up in the black hole, the black hole is warmer than usual makes time travel possible. The warmer the black hole is, the faster the black hole dissipates, says MODOK, a research scientist on black holes and the time machine. As explained earlier, because the temperature is hot in the black hole, the scientists realize that time travel is possible because they can get ejected as a piece of Hawking radiation. MODOK and Kim Jong Un want to capture Tony Stark because he has hidden secrets about the time machine

(I hate everything about you by Three Days Grace)

3. Information about black holes & NASA

A black hole is composed of both waves and particles. It is when a star collapses empty black space pulls everything into its path. Professor Stephen Hawking says a region of space-time from which nothing escapes because gravity is so strong. Even though it is called a black hole it is not black and emits light.

NASA found a black hole 700,000 kilometers away from the moon using satellites. If the black hole gets closer to it, it can pull it into its orbit and disrupt the tides potentially. It can cause extreme weather changes like an ice age. Also, nighttime would be darker, and animals that rely on the tides' would become extinct.

(Black hole sun by Soundgarden)

4. Kid & Tony building Ironman suites.

Tony starts to meet some kid named Joseph that is interested in him. The kid is mechanical and knows everything about building stuff, so Tony bonds with him. (the kid from Iron Man 3). He gifts him an Iron Man suit and an extra Tony Stark Arc Resonator. He teaches Joseph the ropes about building, and they bond. Iron man loves the kid and plans to take him around as they learn more about the time machine and what is needed to make it run.

(Ironman by Black Sabbath)

5. Particle accelerations with kid

Tony and Joseph travel to Switzerland and learn about particle accelerators. He learns that when two protons collide in a particle accelerator, miniature black holes make. The theory is that when

a mass is in a small amount of space, the protons collide head-on, and make black holes. The black holes evaporate because of Hawking radiation. The colder it is, the less Hawking radiation produced. It promotes time travel. Tony uses computer modeling to predict the black holes. Tony uses magnets to create more proton collisions, the more black holes produced per second. The kid helps Tony make a quadruple-sided magnet that creates four-times the proton collisions creating more black holes a second. Tony then uses Rb-235 to weaken the black holes' suction power. Rb-235 causes negative acceleration on the black hole pulling the acceleration the other way and weakens the suction.

6. Mini black whole with kid

Tony Stark and the kid made a mini black hole in the lab and proved Hawking Radiation. Hawking Radiation is light is emitted from a black hole. Stark and the kid made a black hole composed of sound in which when Helium is super-cooled to just above zero; the sound will not pass through the black hole. However, due to Hawking radiation, the light gets emitted from the black hole. Stark and the kid also found out that Rb-235 causes negative acceleration, and it can close it. The world's leading scientists try to calculate the amount of Rb-235 needed to close a black hole. They come up with an exponentially large number, and Mr. Stark thinks they should collect all the Rubidium-235 in the world, we are going to need a lot of it to close a black hole, Stark says. They collect it from research facilities all over the world and give it to NASA for its mission.

(Kids by MGMT)

7. President Trump scene

President Donald J. Trump comments on the black hole, say, the black hole is approaching the moon, and could have devastating effects on life as we know it. It needs to be closed because the weather will be too extreme for life to exist on Earth. Trump says it's a supermassive black hole and will eventually eat up the whole earth. President Trump asks Col. James Rhodes to ask if Tony Stark can help since he can figure out anything. Col. Rhodes approaches Tony and reluctantly says yes. Tony only says yes because Trump promised him the Nobel Peace Prize if he saves the world again.

(Supermassive Black Hole by Muse)

8. Astronauts traveling time

Stark is leading a group of NASA astronauts to travel to the black hole. He theorizes that enough Rubidium will close the black hole, but they have to worry about getting too close. Tony uses his tech-savvy ways to produce extra Iron man suits, in case they get sucked into the black hole. A team of 12 astronauts is now in Iron man suits. The Iron man suits will protect them from destruction in case they get sucked into the black hole. It will save their life in case the pressure

in the black hole gets to be infinite. They launch into space with a spaceship. The black hole is 174 days away at light speed. They carry 50,000 tons of Rb-235 on the spaceship and plan to use a high-tech laser to close the black hole with the Rb-235. One hundred seventy-three days have passed, and they are one day away from the black hole, but get sucked into it. No one knows if the Rb-235 works, and NASA loses communication with Tony Stark and Co.

Since the black hole was a supermassive black hole, the Gravitational Pull on the astronauts and Tony Stark did not break apart the Iron man suits. They have 2 miles of space within the black hole. Had it been a smaller black hole, the Gravitational Pull would have been too strong and even go through the Iron man suits. The astronauts and Tony Stark described the experience as traveling at light speed like you are getting torn apart. Tony Stark then says we were lucky it was a big black hole; we did not fade to black.

Everyone is wondering if the astronauts and Iron man are dead or did the suit protects them. No one knows. A leading scientist, Stephen Hawking, says If the Iron man suit protects them, they are traveling time. They will emit through a white hole, says the scientist. A black hole just sucked in the nearby planet of Mercury. It is heading toward the earth and the moon. According to Stephen Hawking, more Hawking radiation is produced with an increase in temperature. Since Mercury got sucked in the black hole, then it will be hotter, causing more hawking radiation. The more hawking radiation produced less time-traveled less possibility of getting stuck inside a black hole and infinite time loop inside the black hole.

After traveling time for two years, the astronauts & Tony Stark wind up on Mars. That makes them the first astronauts to officially land on mars. Tony & the astronauts now have to their name that they made the first "footsteps" on Mars. Tony Stark describes Mars as a red planet because it has rusty iron on the ground. He would also describe it as having a rocky terrain altered by chemical reactions, volcanos, impacts, winds, and crustal movements. Tony & the astronauts are fascinated by Mars but they must come back because they are running out of the Ironman suits battery life. After inspecting Mars for a bit, he says he will leave the rest of the exploring to Elon Musk. Tony tells the astronauts to bring back souvenir rocks with them. He says they will be worth a lot of money someday. The astronauts comply, Tony & each one of the astronauts has souvenir rocks with them since they wanted something to remember Mars by. Elon Musk excited by the rocks pays a cool \$50,000 from one of the rocks the astronauts had since he wants to go to Mars too; he had no idea they would end up there.

After coming back, NASA restores communication with Stark & Co. Tony, and the astronauts came back with one percent battery left. Then greeted by reporters, who demand a press conference. The astronauts and Tony Stark collectively say to the world, we made history; we traveled time. It all depends on the size of the black hole on how much time you travel. The bigger the black hole more time traveled. The problem with it is there are not many black holes just floating around.

(Rocket Man by Elton John and Footsteps by Pop Evil)

(Rocketman for their journey into space and Footsteps for their landing on mars)

9. PLR Chaz and AJ interview

He then goes on the radio station 99.1 PLR, the classic rock station, and explains to Chaz and AJ about the time machine. He tells them that it needs to be done in space, and since Mercury got sucked in, we can be sucked out as a piece of Hawking radiation. Chaz and AJ joke with Ironman about his lack of luck finding love. Tony then tells Chaz and AJ that Pepper is the love of his life. I have loved her since the beginning and will continue to love her. An iron man tells Chaz and AJ he appreciates the music since music helps him get through the day, and the interview is over.

(Chaz & AJ get to pick the song that goes here - DO NOT PICK A SONG I ALREADY MENTIONED - Lots of PLR songs on here! What I am looking for is a song that defines PLR as a radio station that both of you and the rest of the crew can agree on.)

10. Cocaine scene

Tony is excited about traveling time wants to tell his girlfriend Pepper Potts. He quickly travels from the press conference to Pepper's home after bragging about traveling time for an hour. Tony undresses Ms. Potts. They have aggressive sex together, but Tony goes too far asking for a lewd sexual act. Tony was so excited to see Pepper that it was the sixth time they had sex that day. Tony then has Starbucks coffee delivered for him and Pepper. It had a surprise in it crack cocaine. Pepper disgusted at Tony refuses to drink, saving herself from the cocaine. Pepper then says, fuck you all you want is sex you do not love me. You do not! She then runs from Tony, this time leaving for good. Tony is left alone on his couch at Stark Industries with his coffee and watching TV. Before leaving Pepper calls the cops on Tony and claims he heard a voice from her. Tony admits to it and the cops take him to the hospital. He then gets sent to a psychiatrist facility. Tony refuses to go and the cops take him down.

(All apologies by Nirvana)

Tony & Pepper S & M scene trailer

Pepper completely dominates Tony. Pepper grabs Tony and manages to get him naked pulling all of his clothes off. She leaves his boxers on and puts her hand inside his pants wrapping a USB cord from his phone around his ballsack. She tugs on it and makes him feel great pleasure and pain. She then pours candle wax on Tony's stomach. She whips him hard and fast and says do you want more Mr ironman? She then spits in his eye and says is this all you ever wanted Tony? She then begins to put her hands around his neck in anger trying to choke him. Tony realizes this went too far tries to resist but passes out. She then puts duct tape to his mouth because he is yelling for help. She then handcuffs him to the bed and leaves him there for

hours until the cops come. Tony says yes and the scene is over. She then puts her clothes on and says this is the last night you'll have with me. You better remember it, ironman. Pepper is mad at Ironman for wanting sex and only sex so decides to give him some cheap thrills and turns into a freak because of it, giving Tony what he wanted for one night only. Pepper tells the cops he heard a voice from her and he's schizophrenic and that she wanted to give him his last night with her. She also handcuffs him because she's scared of him. Tony argues that she tried to choke him during sex; the cops laugh and say you can't take her? You can't get a woman off of you? The cops then uncuff Mr. Stark. Tony runs and the cops chase him. He ran so far that the cops had to use their cars to find him.

(S & M by Rhianna)

I wanted to make this PG-13, so this will be done without showing any of pepper and only Tony in his boxers. There will be no nudity, just adult-related themes making it suggestive and PG-13.

I would need Thorazine before doing this so I feel every second of it.

11. Cops scene

A team of 4 cops fights Tony Stark. As one of the officers gets out of their car Tony immediately punches him in the face. The officers then take Tony down by the legs and have trouble getting his left hand back to handcuff him. The officers then bang Tony's head against the top of the cop car and belittle him. Tony is then sent to jail for one night. He is chained to the desk and the cops ask him questions. They begin to laugh at him because the irony is it happened on a holiday. One of the officers asks Tony how to spell a word and he says I'm not helping you write a report on me. He spends one night in the holding cell. He goes to see the judge and the judge lets him off as long as he gets evaluated at Stony Brook's CPEP.

Bad Boys by Inner Circle (theme from cops) or N.W.A. Fuck Tha Police

12. Psychiatrist scene

Two psychiatrists Amy Gardner and Maria T Santos Dunphy evaluate Tony at CPEP and decide to put him in a psychiatric facility. After Pepper commits him, the psychiatrists begin to evaluate Tony. He at first lies to the psychiatrists and says he does not hear voices. Does Dr. Gardner say who do you trust? He says Pepper but they know he is lying.

The psychiatrists know he is lying inject him with 450 mg of Haldol Deconate, he fights them off, and they tie him to the bed. On Haldol, he figures out the secret to time travel while dazed and confused. Now they believe if you give Haldol to a non-mentally ill person it makes them smarter. They try to make him hear voices by whispering and talking about him. He realizes what is going on so he does not hear voices. He begins crying about Pepper because she is the only thing he can dream, and visualize. The team of psychiatrists is trying to figure out why

Tony can figure out anything. They think the Haldol is making him smarter. They say he is also good at everything and does not care about anything except for Pepper that's why he only hears voices from her.

Ironman had to defend himself because a lawyer wouldn't do it. They are all jealous. Ironman claims that the psychosis was drug induced and also claims he does not hear voices. He says he's never heard voices and claims he can sing letting the jury hear a version of his black hole sun and says would a schizophrenic have emotion in his voice? He says they only give him the haldol to ruin his photographic memory and the only thing it does is help him figure things out faster like time travel.

Tony takes the psychiatrists to AOT court and wins in court because the judge happened to like him. He says he heard a voice from her and loved her; he was on crack cocaine. The psychiatrist at the corner of the defense says it was drug-induced, and therefore, is not mentally ill. The psychiatrist in the corner of the prosecution says even if he is not a schizophrenic he's too smart and he doesn't trust anyone. The judge and the jury decide an Iron man is not guilty because he was doing crack cocaine causing psychosis.

Ironman calls Dr. Adeeb Yacoub to the stand:

Dr. Adeeb Yacoub wants to test an experiment. He believes Ironman is still Ironman without the drugs. He tells the court I will give Ironman activated charcoal to get all the drugs out of his system to see how he acts. The jury is stunned by the creativity of the psychiatrist. The prosecution wants this madness to stop now and the judge allows it. In an attempt to lower Ironman's intelligence and to stop from him drinking coffee, and prove his sanity, the psychiatrist orders activated charcoal to get all drugs out of Ironman's system. The prosecution firmly believes that the drugs are making him Ironman. They believe the drugs and the coffee are making him smarter. The defense believes the opposite. The psychiatrist orders activated charcoal and they wait for it to kick in. The jury goes on recess until the drug has kicked in and one hour later they adjourn. Ironman takes the stand and they give him a mini-mental status check and he passes. They also ask him questions to prove there is no mania and psychosis and he passes. Dr. Yacoub tells the jury see we just took all the drugs out of the Ironmans system AND HES STILL IRONMAN. The defense rests his case.

The prosecution lawyer calls Dr. Amy Gardner to the stand:

The prosecution psychiatrist lead by Dr. Amy Gardner asks Ironman who do you trust? Ironman says I surely do not trust you getting a reaction out of the jury. You do not trust me and I am your psychiatrist Tony? Then answers that he sometimes trusts pepper but she is no longer in his life. He says I trust no one because no one is trustworthy after being hurt trusting people. Pepper was the only one worthy of trust. All Ironman can think about is the song by Papa Roach who do you trust? and the psychiatrist thinks because he relates to the song he is insane. She rests her case.

The jury comes back with a decision and declares Tony Stark mentally sane and therefore fit for society again. They said the biggest factors influencing their decisions are drug psychosis and activated charcoal. The jury unanimously states that Tony Stark is not mentally ill. The judge congratulates Tony and says get out of here save the world! The judge never thought Tony was mentally ill. He is a big fan of Mr. Stark that's why he wanted to take the case.

(Comfortably Numb by Pink Floyd)

13. Pepper & hulk scene

Pepper leaves his building and goes to cry to the Hulk. Pepper is then fallen into hulk's giant arms and hugs him. They then begin to cuddle over chocolate and coffee, and the hulk begins to talk about his love for working out. Hulk and Pepper then cuddle all night.

(Layla by Eric Clapton)

Tony realizes the crack messed him up, but is addicted to crack and blows his fortune. It does not lower his intelligence that much, but his visualization skills are low now. It seems that after his intense use of crack the only thing he can visualize anymore is Pepper. Tony vows to avoid using crack again and figures out that vitamin c promotes visualization, but it is not permanent. Tony then goes on a coffee binge because crack withdrawal causes a person to love stimulants, and realizes he has to go back to the black hole to close it before the world ends as we know it. His two favorite drinks now are coffee and orange juice. He loves coffee. It turns his brain on and orange juice because it helps him visualize.

(Cocaine by Eric Clapton) or (Rx Medicate by Theory of a Deadman) Cocaine for him doing cocaine and medicate for him drinking coffee.

14. First cup of coffee

Tony Stark has a dream of his father giving his first cup of coffee. He remembers it vividly as it was an event in his past and his father, Howard, said that was all he needed to change the world. After the dream, he then realizes that coffee is the reason he is so smart. He realizes that coffee has a lot of cognitive benefits, and it makes him who he is. The coffee is the reason he can figure out things so fast. Without the coffee, he would not be so smart.

(Cup of Coffee by Johnny Cash)

15. DSS scene

He then gets sent to DSS because he has no money. He then begins selling coffee and cigarettes. He makes friends at DSS, but they all hate him because they know he is better than them and know he does not belong there. At DSS, they steal his coffee, and then Iron man realizes he is just like them without the coffee. Ironman learns a new habit at DSS: smoking cigarettes. While at DSS he sleeps with two camera phones on him watching his every move in case he gets

attacked or stabbed, so they know who did it. He starts to feel sorry for himself and decides to go to a hooker.

(What it's like by Everlast)

16. Fire at stark industries

While at DSS, Kim Jong-Un and the MODOK steal all of his suits and pour coffee all over Jarvis. Before leaving, they set Stark Industries on fire with gasoline and a match. They also steal his billion dollars out of his bank account after hacking his computer and getting all his passwords and pin codes. Jarvis, as smart as he is, uses auto repair to repair himself without them noticing. Happy Hogan, his security, was spending time at stark industries safeguarding it. Kim Jong Un, overdoses him on the insulin shot, leaving him dead and powerless. He gives him 1000 cc of insulin, which puts him in a coma, and he gets burnt alive.

(We did not start the fire by Billy Joel)

17. Sex with prostitutes

Tony gets lonely because Pepper left him, and no one else cares about him. One of the reasons she left Tony is he is better than her. He then realizes he needs to pay for sex now and orders a high-end prostitute. He then gets stood up by a blonde, which he pays for at a high-end hotel. The call operator working for the prostitute says Vest can not attend to you; he has no money. Tony had 80.00 dollars in his pocket from selling coffee and cigarettes, but \$100.00 was required, and he did not have all the money needed to sleep with the blonde. He then pays for sex with a black woman who kicks him out because he did not climax and a Spanish woman who only cared about the money. The only reason why he was getting them before was he had money.

(Roxanne by The Police)

18. Ironman gay?

The iron man turns gay. The iron man sleeps with a hot Spanish guy named Carlos and realizes men are easier to get than women. He has sex with Carlos blowing up all the news coverage on the internet, TV, newspapers, and magazines saying Iron man is gay. He then admits he has a crush on Captain America. I have been closeted my whole life, gay is the new straight, and I want to accept myself.

(Bohemian Rhapsody by Queen)

19. Goodbye Jarvis

The iron man then goes back to Stark industries and finds Jarvis is still alive even after the fire. He takes a baseball bat to Jarvis. He then says I will miss you very much, and thanks for the

memories. After repeatedly hitting Jarvis with the baseball bat he exclaims he destroys everything he loves. Ironman loved Jarvis but realized he did not need him. He says to Jarvis, I have used you as a crutch my whole life, I no longer need you; you do not define me. After his crack cocaine gets out of control, Ironman starts crying and takes another hit of cocaine.

(Mr. Roboto by Styx)

20. Eminem/Jeff Bezos feud with Tony

He then messes with Jeff Bezos and Eminem at DSS. Jeff Bezos realizing Tony should be living the high life donates one billion to Tony for the idea of different levels of amazon prime. Tony was trying to get people not to shop on Amazon anymore because they are making a monopoly on online shopping, putting malls and mom-and-pop stores out of business. Jeff gives him the billion because Tony promised he would save us from the black hole, and one billion is nothing to Jeff Bezos. Eminem frustrated at Tony realizes he is gay and admits it because he did not want to be asked about it anymore, and things are easier that way. Eminem then says, the thing they got me was if I admit it people will leave me alone.

(Bad Blood by Taylor Swift)

They put him on the television, and Kim Jong-un finds out where he is. Kim Jong-un says the Nuclear War ends if I can travel time in one of his suits. Kim Jong-un wants to travel time. Tony has now lost everything. Kim Jong-Un, vows to stop the war with the United States, upon one condition, I travel time. The government agrees, and Tony moves to North Korea. That is what stopped Nuclear War.

(Imagine by John Lennon)

Tony does everything to get Pepper back, even writing six-hit pop songs about her, and tries to sing them. She says, stops trying hard, I don't love you anymore; I do not want to hear you sing. SO GO AWAY! Bruce treats me better, you asshole. One of the songs was named You have got it and written by Tony Stark about Pepper having it.

(Paperback Writer by the Beatles)

21. Gala Scene

Tony gets an invitation to a gala, for his research on black holes, and he goes there alone, Tony sends Pepper an invitation, and she tells Tony, I will go on one condition, alone! Pepper and he both separately go to the gala to honor Mr. Stark. In a desperate attempt to get Pepper's attention, he starts singing Soundgarden's Black Hole Sun at the Gala to honor his discovery of how to close a black hole. He is completely drunk and singing the best he ever did. Even pepper thinks it is good, but that is the reason she leaves him because he does everything too well. She cries because part of her still loves him, but she leaves the auditorium alone and confused.

(Black Hole Sun by Tony Stark)

In a fit of rage, Tony smashes his award at the gala leaving the crowd to boo him. Tony then begins to go into a downward spiral, losing all his confidence and almost everything else. Iron Man starts living as a hermit, and he begins to fear that no one cares anymore.

(Foolin' by Def Leppard)

22. Nick Fury Avengers Initiative

Iron Man is not even wanted by the Avengers anymore since they say he is Schizophrenic. Nick Fury says not only are you a narcissist Tony, but you are a schizophrenic. We can not have them on our team. Nick Fury did not believe the psychiatrists and calls Tony a schizophrenic and narcissist and decides to end his term with the Avengers Initiative. Nick Fury says the only voice he hears is from Pepper because that is all he loves. You only love Pepper Tony, and that is why the voice you heard is from Pepper. I can not have a schizophrenic and a narcissist in our team; you are no longer part of our team. Tony cries and feels useless and then takes another hit of coke.

(Psycho by Puddle of Mud)

23. Colonel Rhodes vs Tony Stark

Colonel Rhodes still respects and cares about Tony and wants to help him out. Rhodes teaches him how to work out, and Tony Stark gets buff. In a cameo of the Hulk, when Tony and Hulk work out together, and Tony gives him a run for his money. Tony could not even do a push-up, but now does 50 1-handed push-ups, even impressing Banner himself, who does 1000 of them.

Tony and Colonel Rhodes get into a fight that has been brewing since they first met. After an argument, Colonel Rhodes begins to start an argument and fight with him. He starts a fight with him because Tony outclassed him in the 1-handed push-ups category, only coming in second to the Hulk. He starts yelling at Tony, and Tony says you're going down. Tony gets mad and throws a right hook after doing 50 1-handed push-ups and completely knocks out Col. Rhodes after they work out. Colonel Rhodes says I cannot stand you, and on the cocaine, you are a different person. All you want to do is fight and have sex. Tony starts pacing and walking over Colonel Rhodes, thereby declaring him the victor.

(Hero by Pop Evil) or (you're going down by the sick puppies)

Tony Stark fixes Colonel Rhodes lock on his door

Tony still cares about Colonel Rhodes and Colonel Rhodes got his key stuck in his door to his apartment. The key just won't get out of the lock. He uses all his strength to get the key out of the door to no avail. He then gets a screwdriver and takes it apart and puts it back together. The key finally gets out of the door and the door locks again. In the time doing that, Colonel

Rhodes got locked in the room with Tony Stark and starts to go crazy because he can't deal with Tony for extended periods of time. Tony figures a way out of it and uses a screwdriver to take the door handle apart and opens it saving the both of them. He then fixes it by taking it apart and putting the screws on tightly and together. Colonel Rhodes apartment is now safe and thanks to Tony Stark. Colonel Rhodes wants nothing to do with Tony Stark but thanks him and tells him to go away. He says I know you can do anything Tony you don't have to prove it to me but you just did, congratulations. Colonel Rhodes keeps his door locked because the whole world is after him too because he is friends with Tony Stark. That's why he wants to keep his distance and because he's jealous of Tony.

24. Hulk vs Floyd Mayweather

After Tony Stark and Col. Rhodes fight, the Hulk decides to train as a boxer. Floyd Mayweather challenges the Hulk because he knows how big and strong and intimidating he is, and they get into it. Hulk lasted 12 rounds with Floyd but loses and loses in a decision 7 -5. Judge Santiago Morales scores it 115-115. Judge Judith Nixon scores it 116-114 and judges Frank Tayberry scores it 116-114 giving Floyd Mayweather the decision. It was on the television program HBO boxing after dark. Tyson Fury, in attendance, impressed that Hulk lasted 12 3 minute rounds says he wants to train Hulk as a boxer. Tyson Fury said Floyd just outclassed you, but I can see you defeating him when you're mad and trained. He begins training as a boxer and learns the ropes from an undefeated boxer promising to get revenge on Mayweather when trained. Hulk says, even though I am strong, I am untrained and not as fast as you. Mayweather says he is the best, and Hulk gives Floyd props, and Hulk does the same. The Hulk, Tyson Fury, and Floyd Mayweather become friends.

(Eye of the Tiger by Survivor)

25. Kim Jong Un traveling time/Prisoner of War Scene

He then loses a battle against MODOK after his battery pack loses charge. Kim Jong-Un tells the US government that the war ends when I travel time. MODOK and Kim Jong-un capture him and make him a slave.

Kim Jong Un then tortures Tony gives him an insulin shot. He lowers his blood sugar so much that Tony faints in his chair. MODOK and Kim Jong Un torture him punching and kicking, while he is handcuffed to the chair. Kim Jong Un then lets Tony go, saying we are on the same side Tony, now you work for me. Kim feeling bad uncuffs him, and since he has nobody, he is working for Kim Jong-un.

Tony Stark makes the black hole out of sound-waves and uses Rb-235 to slow down the black hole's power. He tells Kim that the black hole will consume the whole building up, so everyone in the building evacuates as they see Kim Jong-Un's travel time. Tony applies cold to the black hole, making Kim Jong-un travel time for an infinite period because of less Hawking Radiation.

Tony says, if I apply cold to it he will be traveling time longer, possibly infinitely because he will not emit as a piece of Hawking radiation

(Kashmir by Led Zeppelin)

26. Journey to North Korea

Hulk talks some sense into Pepper and says: Tony loves you, you should be with him, not me. She agrees and uses Hulk to get Tony back, on Hulk's one condition: I get to kiss Pepper, she then agrees to give him the sweetest best kiss of his life. Pepper then begins to miss Tony after the kiss from Tony. The team consists of Colonel Rhodes, Hulk, and Pepper, and the assembled team begins to travel to North Korea to find Tony. After the 1-day journey, they arrive in North Korea.

(Could I have this kiss forever by Whitney Houston)

27. MODOK fight scene

As Tony watches Kim travel time, the Hulk grabs Tony into safety. Tony grab's his suit from Stark Industries, and Tony and Pepper then kiss on the top of the Empire States' building, just as Kim Jong-Un, is traveling time. Then, Ironman tricks Kim Jong Un into traveling time on earth. The time machine can only be in space due to zero gravity and friction. Ironman then applied cold to the black hole lowering the temperature to make Kim Jong Un loop in time. It elongates the time spent in the black hole. When the temperature lowers, less Hawking Radiation is produced, and a less possibility of escaping the black hole as a piece of Hawking Radiation.

(Wonderful Tonight by Eric Clapton)

MODOK travels to New York to meet Tony and Hulk. The Hulk then grabs MODOK and puts him in a Full Nelson. Hulk uses all his power to hold MODOK still as Tony attaches a bomb to his arc resonator in which he throws to the Hulk to attach it to MODOK's wheelchair. After the bomb goes off Tony Stark is wanted by everyone in New York for blowing up half of New York and is considered a murderer. He loses all his superpowers because the arc resonator is blown up and then thrown in jail by the Hulk. The Hulk then lets Tony kiss Pepper one last time. Hulk handcuffs him and takes him into custody. Tony Stark is no longer a superhero and is a murderer.

(Shoot to Thrill by ACDC)

28. Tony Stark wins the Noble Prize

Tony is let outside the jail for one day for his Noble Prize Ceremony. Tony Stark wins the Noble Peace Prize with Pepper, Col Rhodes, and Nick Fury are the only ones attending. He wins the Noble Prize for finding out the magnets increase proton collisions and make black holes, and Rb-235 causes negative acceleration on the black hole pulling it the other way. Pepper and Tony

kiss as Tony gives the speech for the Nobel Prize in Stockholm. Tony reads his speech off note cards and is awarded the million dollars. At the end of the ceremony, Nick Fury congratulates Tony. Nick says since Tony won the Nobel peace prize, he can become an Avenger again and was kidding. Nick Fury just said to Tony I am hard on you because you challenge me, Tony, you do. You are one of the hardest Avengers to work with, but we need you. Tony is excited by the news, says I AM IRON MAN and it fades to black.

(Cult of Personality by Living Colour)

29. Black Panther bails Tony Stark out of jail - extra scene 1

The Black Panther comes to see Tony Stark in jail. He realizes the Hulk set him up. Tony started to make a deal with the Black Panther to buy Vibranium from him. He says he needs to make the suits out of Vibranium to travel time. He says, anything other than Vibranium, the suits would get ripped apart. We were lucky the first time, but I can not press it. Black Panther then talks to the US government about getting Tony Stark out of jail, saying he will save the world from the Black Hole eating up the earth by actually closing it with the Rubidium. He also says he needs my help because I have the Vibranium.

(Jailhouse Rock by Elvis Presley)

30. Tony's Message - extra scene 2

Ironman finally gets a message but it's by a Brazilian man. He gives him a happy ending. (because they joke about Ironman not getting a message in the previous movies).

High Energy Neutrinos

While in jail, Tony took a book out about neutrinos. He theorizes that neutrinos or high energy acceleration particles from beyond our galaxy can destroy black holes. Neutrinos are massless

and come from nuclear reactions that take place in the core of a star. He theorizes that neutrinos are the key to destroying the black hole since it is too dangerous to close it. They let him out of jail because of this discovery and all he needs to do is find a way to isolate and accumulate Neutrinos from a far away galaxy. He proposes that he travels time in the black hole since closing it is close to impossible. He and the astronauts will travel time again this time for an extended period of time to collect neutrinos. He will bring the neutrinos to the black hole to destroy it. Since they are massless he enlists Magneto to help him collect the Neutrinos. He says Magneto is the only one that collect the Neutrinos and destroy the black hole. Magneto the collector of metal and subatomic particles is the only one that can collect the Neutrinos from far away galaxy's by creating a localized electromagnetic field so he can levitate massive objects like all the neutrinos in the galaxy to close the black hole This is Ironman 5.

Vibranium manipulation or not?

Magneto tries to control the Vibranium out of Wakanda since the black panther wants nothing to do with Tony Stark now that is he working with Magneto. The vibranium is unaffected by Magneto's powers and Tony and Magneto travel to Wakanda to get ahold of some to make the Ironman suits out of Vibranium for Tony, the astronauts, and Magneto. Since vibranium doesn't have metallic properties magneto can't manipulate it. Magneto theorizes that he can control the mixed metals with Adamantium so he tries again with a different scope and this time manipulates the other metal. He manipulates the vibranium with the adamantium in it but not the pure vibranium like what they need. Magneto frustrated as his lack of abilities wants to steal all the vibranium from the black panther. Him and Tony go on a 5 day trip to Wakanda and Magneto starts a fight with the black panther.

Fight between Magneto and Black Panther

Magneto cannot manipulate the black panther since his suit is made of vibranium a rare metal. Magneto uses his power to manipulate objects and it just bounces off of black panther. He uses his strength to throw the objects back at Magneto. Black Panther is safe because Magneto cannot manipulate vibranium. Magneto throws a 2 ton meteorite on black panther and he uses his super healing powers to recuperate. Magneto throws another meteorite at him using his magnetic powers and the black panther picks it up and crushes magneto. Magneto recovers and talks to the black panther about giving him the vibranium. Magneto uses his power of telepathic mind control for him and Tony to instruct the black panther and his people to bring all the vibranium out of wakanda to the states for time travel purposes.

Gravity Manipulation and time travel on Earth

Magneto has an idea for Tony Stark. He theorizes that since black holes can only be traveled in space he will make earth zero gravity like space. Magneto uses his gravity manipulation power to change the scope of gravity of earth as we know it. Newton discovered gravity in the 1600's stark said and he never thought anything like this would happen. Tony was near an apple tree

and the apple fell and just levitated right back up. He never thought he would see anything like this until He met Magneto.

Time travel is possible on earth now

The astronauts and stark thank Magneto for manipulating gravity. We can now travel time on earth. The earth has changed a lot since Magneto manipulated it. Everyone is floating through the air and levitating. Tony is actually mad at Magneto because he can't have sex with Pepper anymore! Tony goes back to the lab and cools helium to just above absolute zero making a black hole in the lab. He uses computer modeling to predict what is the safest black hole he can take into space. He finds one, and freezes it to give them time to get into the black hole.

Tony makes the Ironman suites out of Vibranium

Tony goes into the lab to create Ironman suites out of Vibranium. He and the kid get to work while the astronauts and magneto watch in awe. The kid knows how to make the suites now too. Tony taught him in Ironman 4. The kid & tony make 14 suites for the 12 astronauts, magneto, and tony. Tony has a talk with the kid about the dangers of going into space and traveling time and talks him out of traveling time because he really wants to go. The kid cries and Tony says kid don't you wanna grow up on earth? You'll be middle aged once we come back from this mission. I don't want you to miss your childhood. The kid agrees and Tony puts the finishing touches on the Ironman suites.

Into the black hole we go

Tony applies heat to the black hole to extend there time in there. He says its now or never we have to go in. Magneto creates a force field around the black hole seperating the black hole from the other people and puts the astronauts, tony, and himself in the force field and they go into the black hole. The astronauts, Tony, and Magneto get stuck in the black hole. It is safe for them because they are in Ironman suites made of vibranium. This is not a supermassive black hole with a 2 mile radius like before, its a smaller black hole, and they hope they travel time enough to go far into the galaxy. Tony hopes the heat works.

Traveling time again...

They are traveling time and lose contact with everyone. They hope to get emitted as a piece of hawking radiation. They finally get emitted as a piece of hawking radiatioin in a nearby undiscovered galaxy. Magneto uses his powers of bearing metal and subatomic particles from the nearby galaxy and almost destroys himself. Magneto's eyes turned red and face got red and whole body turned red as he grabs every neutrinos from a faraway galaxy. Tony and the astronauts uses there Ironman suites to travel back to earth leaving magneto behind to fly with the Ironman suit to the black hole.

Magneto dies

Tony and the astronauts get back to earth. Everyone wants to know where magneto is. They notice a big explosion in the sky and they see that the black hole over the sky has closed. Magneto sacrificed himself for the sake of humanity. Magneto ends up exploding as he destroys the black hole too much force for any one person to endure.

Magneto's Funeral

All the x-men and avengers are at magneto's funeral and respect him very much since he saved everyone from the black hole. They joke maybe he wasn't a bad guy after all since its left ambiguous the reasons he does things and why he does them.

Ironman puts the coffee down and says his final goodbyes to Jarvis

In his final goodbyes before it fades to black, he throws his cup of coffee of the mountain and wishes Jarvis the best. He misses Jarvis and the coffee but knows he does not need them. It does not define him.

Ironman DSS scene # two

Tony Stark leaves his door open to entice people to go in his room at DSS.

He installs a cop cam inside a teddy bear's clear eyes and in the ceiling.

He watches if anyone tries to go inside his room to try to poison him or take anything from him.

He suspects people are going into his room to try to poison him and he wants to get to the bottom of it.

His amazon alexa which he uses to wake himself up is missing and he wants to get to the bottom of it.

He goes to extreme lengths to catch the culprit.

He also installs it to watch himself while he is sleeping because he fears they will kill him in his sleep.

He wants them to come in and try thats why he installed the cop cam.

He install it near the heating vent near the corner of the room to get a full angle of the room.

He also installs one in the ledge of the top of his room where they can't get at it because its too high.

He is super afraid at DSS and wants to know if anyone kills him and he wants them to be charged.

People are actually scared to go inside the room because they know its bugged with camera and leave him alone.

His alexa is gone though, and that was his primary source of figuring stuff out.

The cop cam is attached to his phone where he is watching his room at DSS.

Tony Stark uses fun-tack to fix his glasses

Tony stark tried everything to fix his glasses. At first, he tried scotch tape and it didn't work. Then he asked the janitor for electrical tape and that didn't work. His last resort was crazy glue and it didn't even

stick. He then asks his computer friend for some fun-tack and that worked. This guy is even better at computers than Tony, so he respected his opinion. Tony suggested the fun-tack to him when he had it. Who knew it would have worked? Tony Stark's glasses broke in the fight against Col. Rhodes when he punches him his glasses fall off and break. His glasses were breaking in a bad spot that's why crazy glue didn't work! He used the fun-tack and that stuff worked like a charm. The glasses were broken to the right of where you put your nose in a really bad spot in the thinnest part of the glasses.

Ironman sleeps with a female CO

Ironman made the best of his time in jail. The female COs actually liked him and went into his cell to give him a good time. They spent the night together and all other people in jail were jealous of him. The female CO was a blonde just due to his liking. They spent the night together and had wild sex and no one said a thing. They were all scared of Ironman. I guess we found love in a hopeless place reigns true. The Rhianna song. They just watch him and cheer him on but in reality, they are jealous of him.
